

Patio Cover's

Whether you need shade from the sun, a place to enjoy parties or protection for your vehicle, Metals USA offers a complete line of "low to no" maintenance Covers that will take care of your outdoor needs.

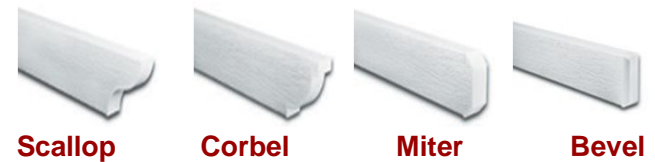

- **Strength**
Metals USA's insulated laminated roof panels snap together tightly, forming a strong, structurally sound roof as well as a weather-proof barrier protecting your patio or vehicle from the elements.
- **Versatility**
Metals USA Covers can be specifically designed to accommodate ceiling fans and light fixtures, giving your outdoor space extra amenities.
- **Durability**
Metals USA Covers are made from high-quality, structural aluminum. Virtually maintenance free, our covers are crafted to never rust, warp, crack, rot or become infested with insects. Our factory finished aluminum components retain the original color, gloss and texture longer and better than patio products made of alternate materials. Plus we stand behind our products with a transferable [Lifetime Warranty](#).

3 Styles Available

- **Insulated LRP (Laminated Roof Panel)** - Metals USA's insulated LRP roof panels are made with an EPS (Expanded Polystyrene) foam core. EPS is a high-performance insulation specified by architects nationwide for many of today's energy efficient homes. Using these insulated panels with our patio components will create a strong, durable Patio Cover or carport
- **Roll Formed Patio Covers** - "Flat pan" or "W pan" Patio Cover/carports provide economical, solid shade that protects you and your home from inclement weather and harmful UV rays while also providing shade for relaxing.
- **Deluxe (lattice wrap)** - Combine solid insulated LRP with embossed aluminum rafters to give enhanced dimension and style to your new Patio Cover.

* Designed to meet virtually all of your needs and all building codes in North America
